Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/700,777	Applicant(s) DATTA, GLEN VAN	
	Examiner Viet Vu	Art Unit 2454	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 August 2006.

Art Unit: 2454

1. Applicant is requested to provide serial numbers of related application cited in page 5 of the specification.

Art Rejections:

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Traversat, U.S. pat. Appl. Pub. No. 2002/0143855.

Per claim 1, Traversat discloses a peer-to-peer relay network comprising:

a) a plurality of N peer systems wherein each peer system in said peer-to-peer relay network is connected to a number of other peer systems in said peer-to-peer relay network that is less than or equal to a connection limit, said connection limit is greater than or equal to 2 (i.e., each peer connects to at least two other peers) (see par. 108, 116);

Art Unit: 2454

b) at least one peer system is a participant who is configured to generate data to be used at other peer systems (see par. 109);

c) at least one peer system is a spectator who is configured to relay data generated by a participant (see par. 112) wherein data is relayed or routed according to one or more relaying/routing/accessing rules/policies (see par. 304).

Traversat does not teach explicitly teach that the connection limit for each peer node is N-2 or less.

It is however noted that Traversat teaches using a relay peer node to allow a peer node to reach other non-connectable nodes. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to recognize that there are two or more non-connectable peer nodes in the system the connection limit for each peer node would have been N-2 or less.

Per claims 2-8, Traversat's teachings encompass all claim limitations.

Per claims 9-20, Traversat teaches applying one or more access privileges to determine if the relay peer node would allow access or fulfill a relay request from a peer system (see par. 456).
